

In a world of machines, people make the difference.

Supply chain problems, staffing headaches, modernization costs and concerns — we know running a manufacturing business can be a production in and of itself. Our team is experienced and invested in manufacturing and distribution, so we have inventive, proven ways to help eliminate obstacles and get things done. That starts by getting to know your organization — everything from the foreman to your company’s five-year plan. This knowledge allows us to quickly find opportunities to optimize your next order, shift and decade of growth. We lend a hand where you need it most, from day-to-day accounting support to fill an immediate need, to strategic planning to help forecast for the future or succession services to set your business up for success when it’s time for your next chapter. In this bottom-line business, our experience, expertise and hands-on help pays off.

If there's one thing we know how to put together, it's a plan for your success.

In manufacturing, the right help makes all the difference. For companies looking to build up their business and their future, our manufacturing experts are ready to step in and add personalized support where you need it most.

Outsourced Accounting Services

Accounting helps keep your plant, shop or factory running strong — but it takes the right staff to keep up. Our team offers partner-level experience to fill in wherever you need it — from high-level strategic planning and cash flow projections to day-to-day bookkeeping and payroll services. We seamlessly step in without disrupting operations and find new, innovative ways to drive profitability and success right away.

Tax Planning

Our team of experts can develop tax strategies that incorporate all aspects of your business functions — ensuring you're optimizing your tax position and receiving the tax credits and incentives available to your manufacturing company. We bring you proactive solutions while conducting regular tax reviews — which means you get fewer surprises and more money to put toward your manufacturing company.

Technology

When everything depends on a smooth operation, the right technology makes all the difference. We have partnerships with top tech providers like Sage Intacct and Microsoft 365, empowering us to customize tech solutions around manufacturing operations of all sizes. From accounting software, to developing KPIs and creating custom dashboards, we can bring in the right technology to make your business more efficient, more productive and more profitable quickly.

Succession Planning

You're not just making products, you're building a business and a legacy. So, whether you're considering a merger or passing it to the next generation, our experts give the process the respect it deserves. We focus on your core business functions, aligning and strengthening your company, improving profitability, reducing overall risk and maximizing value. Additionally, we provide advice and guidance, along with valuation, tax and estate planning insight every step of the way — so you can have peace of mind about moving on to your next chapter.

Consulting

In a business driven heavily by market forces, those that plan ahead get ahead. Our experts find out where you are today and what your goals are, and then forecast weeks, months and years ahead to draw up a plan of action. Whether you need to increase efficiency, fill gaps in your staff, or turn raw data into powerful KPIs for smarter decisions, we're here to provide clarity, expert insight and financial guidance every step along the way.

" We have been with Maner Costerisan for several years and all of our contacts have been very attentive to our unique business needs and challenges. We have not been disappointed."

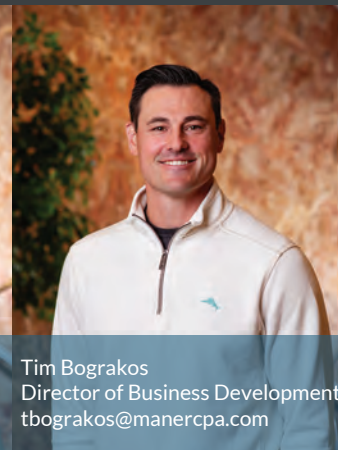

- John Piercefield,
Portland Iron & Metal, Inc.
